

# CORNWALL FARMLAND RESOURCES

## Legend

- Rivers & Streams
- Marsh
- Water
- Farmland Resources
- CCT Fee Land
- CCT Conservation Easement
- Other Protected Open Space
- Cornwall Parcels
- Town Boundary
- Major Roads

**FARMLAND RESOURCES**  
Orthophoto Fields and Farm Soils areas were created from the INTERSECTION of two data sets of importance to agriculture. The first data set consists of three soil groups from the 2010 CTDEP Farmland Soils database: prime farmland soils, statewide important farmland soils, and locally important farmland soils. The second data set consists agricultural land cover (i.e. fields) digitized from 2004 CTDEP black and white aerial photography.

**Data Sources:**  
Transportation shapefiles are TIGER files from the United States Census Bureau. Surface water, and town boundary shapefiles were obtained from the Connecticut Department of Energy and Environmental Protection. Ortho Farm Fields were created by the CT Highlands Project and the Housatonic Valley Association. The Protected Parcel shapefile is a layer created by the Housatonic Valley Association, with data shared by Greenprint members and other public sources, in an attempt to stay current with the ongoing conservation efforts in the Greenprint service area.
